Severe Weather Tips from Ellis Library Security

Last year, for the first time in history, there were over 100 reported tornadoes in Missouri. So, with severe weather season upon us, there is no better time to review some of the basics of tornado safety that could mean the difference between life and death in the event of a severe weather outbreak in Mid-Missouri. Over the next few weeks, Ellis Library Security will be posting some tips and reminders to help everyone be prepared for this severe weather season. This week we will look at the best places to seek shelter in the event of a tornado warning:

In Ellis Library, the safe areas are as follows: the ground floor hallway (from the rest rooms back), the staff break room (staff only), the lower stairwells and the colonnade area of the first floor. Due to the danger of shattered glass, it is important to keep people away from all windows and the “Hole” (the opening above the Bookmark Café). Patrons and staff should remain in the safe areas until given the “all clear” via the public address system.

In Homes, the basement offers the greatest safety. Seek shelter under sturdy furniture if possible. In homes without basements, take cover in the center part of the house, on the lowest floor, in a small room such as a closet or bathroom, or under sturdy furniture. Keep away from windows.

In Shopping Centers, go to a designated shelter area (not to your parked car).

In Office Buildings, go to an interior hallway on the lowest floor, or to the designated shelter area.

In Schools, follow advance plans to a designated shelter area, usually an interior hallway on the lowest floor. If the building is not of reinforced construction, go to a nearby one that is, or take cover outside on low, protected ground. Stay out of auditoriums, gymnasiums, and other structures with wide, free-span roofs.

In Automobiles, leave your car and seek shelter in a substantial nearby building, or lie flat in a nearby ditch or ravine.

Mobile Homes are particularly vulnerable and should be evacuated. Trailer parks should have a community storm shelter and a warden to monitor broadcasts throughout the severe storm emergency. If there is no shelter nearby, leave the trailer and take cover on low, protected ground.

Please be safety minded and never take a tornado warning for granted. As always, if you have any questions, concerns, or would like refresher training for you or any one in your department, please stop by the Security Office, 93 Ellis Library or contact Sergeant Pat Jones at 882-4220.
