

## MU Libraries' Proposal for Student Investment in the Libraries: Fee Schedule

---

Based on the count of 866,000 actual credit hours used during academic year 2013-2014, the table below illustrates how a fee of \$5 in the first year, followed by \$2 annual increases over five years, will yield revenue for significant investments in space, collections and services to address priority needs of students. The library fee will remain at the level of \$15 per credit hour after academic year 2021-2022, until such time as consultation with students may lead to changes in that amount.
