

Staff Advisory Group

12.11.18

Anne Barker – Chair Staff Advisory Group

- Thank you for attending
- Ann is unable to join us today
- Upcoming dates:
 - MULSA Holiday Party Friday, December 14 at 2:30pm
 - Tentative All Staff Thursday, January 17 at 2:30pm
- Felicity Dykas
 - MoSpace is 10 years old. The Digital Services is five years old; it was formed during the Technical Services reorganization in 2013.
 - Digital Services is part of the Archives and Special Collections division, but since that division does not currently have a head they report to Jeannette in RAIS.
 - Staff: Felicity (MOspace focus), Mitch (supervises student and digitization), Ying (HathiTrust processing), 2 Graduate Students and 6-8 student assistants working on specific projects.
 - Suggestions for content or functionality are welcome.
- MoSpace is the Institutional online Repository
 - Role: Preserving MU research and scholarship: thesis and dissertations, research articles, presentation materials, datasets, department publications, magazines.
 - MU is responsible for adding UM System material.
 - DSpace software is used.
 - MOspace is the repository for theses and dissertations since 2006. Authors have the option to make their information available to all, or to MU or UM only. They can have 1-2 year holds on their material as well.
 - ProQuest only gets information about freely available material.
- HathiTrust
 - For digitized material, HathiTrust is the first choice for deposit.
 - Try the Collections tab to find University of Missouri material. Collection names start with “University of Missouri Collection.”
 - Uses Google analytics to obtain statistics about how information is being used.
- MU Digital Library
 - Includes Maps, newspapers, videos, posters.
 - One goal is to move much of this content to the HathiTrust.
 - Islandora software is used; it is open source.
 - Content that we want to keep in the MU Digital Library is collection-based rather than specific individual items. Staff will build collections in the Digital Library.

- New: CrossRef and DOI
 - DOI - Digital Object Identifier
 - It is an identifier that can be represented as a URL.
 - The DOI number is often included in citations in reference page of publications
- New: New Digital Scholarship Librarian, Steven Pryor, is helping to market MOspace and to explore its possibilities.
- New: OER – Open Educational Resource
 - OER material that is created using funding from MU, is also required to be in MOspace
- Anne Barker
 - Closing notes: Please relay ideas for additional meeting topics.
 - Thank you for attending.
